# VALOR RMS

PUBLIC SAFETY

VISUAL ANALYTICS PROVIDE A PROACTIVE APPROACH TO KNOWING THE OPPOSITION

Operating in a proactive, systematic model with intel from multiple sources creates a dynamic link to known offenders and other incidents. Your suspect today may have been an offender in a previous incident. **Valor RMS** allows you to easily manage all aspects of the records and case management workflow while allowing customization to suit your needs. From point of call initiation, the incident data is gathered, expanded, referenced and extended throughout your operational cycle, creating a spectrum of information from dispatch to final case management. **Valor RMS** software makes sure your reports are validated and compliant with federal, state and local reporting requirements such as UCR and NIBRS.

Select Highlights
