

We listen. We learn. We deliver.

VALOR MOBILE

Field Operations & Mobile Command

Real-time CAD and RMS access for officers and first responders in the field.

The extension of your command center — wherever duty calls

The best response plan begins with a collaborative pre-plan. Built for officers, deputies, and field responders who need the power of the command center wherever duty takes them, Valor Mobile extends Valor CAD and Valor RMS directly to laptops, tablets, and smartphones — delivering the same real-time situational awareness dispatchers rely on. Update status, view SOPs, active and prior CAD events, and complete NIBRS-based Incident Reports without returning to the station.

CAPABILITIES

Role-Based Field Ops

- **Mobile Command Center**
Turn any vehicle into a fully connected command post in the field.
- **Self-Service Status Updates**
Self-update status - dispatched, enroute, on scene, add notes.
- **Officer-Initiated & Traffic Stops**
Self-initiate calls for service and traffic stops from the field.
- **NIBRS Field-Based Reports**
Complete NIBRS-compliant reports and generate report numbers on scene.

Situational Awareness

- **Real-Time Mapping**
Live GIS shows fastest route, active events, assigned units, and resources.
- **BOLO**
Instant BOLO alerts before officers arrive on scene.
- **Prior Event History**
Review historical CAD events and known associations before contact.
- **SOP Access on Scene**
View agency SOPs without a radio call back to dispatch.

Connectivity & Reach

- **Cross-Platform Devices**
Runs on Windows, iOS, and Android laptops, tablets, phones.
- **Bi-Directional Communication**
Two-way messaging keeps officers and dispatch in sync.
- **Photo Capture & Sharing**
Take and transmit photos directly into the incident record.
- **Day & Night, Touch-Enabled UI**
Interface adapts to light with full touch-screen operation.

Modernizing public safety and enterprise command & control since 1994.
