

We listen. We learn. We deliver.

VALOR SAFEGUARD

Citizen & Enterprise Safety Reporting App

Secure, two-way communication connecting citizens, students, and employees directly to the responders who protect them.

Law Enforcement

Enterprise Security

Campus

A direct line between your community and those who respond

Valor SafeGuard is an interactive mobile application that enables secure, two-way communication between citizens, students, and employees and the law enforcement agencies, security teams, and organizations trusted to keep them safe. Whether used for community engagement, in schools, or to support private-sector security operations, SafeGuard connects the reporting party directly with local authorities or the appropriate Global Security Operations Center (GSOC). Report suspicious activity, submit an enterprise-defined threat, or trigger a Panic Button — each action opens a secure channel for sharing details, photos, and location, and receiving real-time guidance in return.

CAPABILITIES

Reporting & Response

- **Two-Way Communication**
Connect directly with law enforcement, school security, or your organization's security operations center through a secure messaging channel.
- **Suspicious Activity Reporting**
Quickly document and submit what you see, with optional photos and location, so responders have context before they arrive.
- **Panic Button**
Trigger an immediate alert that opens a live bi-directional line to the appropriate monitoring center.

Intelligence & Configuration

- **Enterprise-Defined Threats**
Organizations configure threat categories so employees and members report using a shared, consistent vocabulary.
- **Real-Time Updates**
Receive acknowledgments, instructions, and status updates from responders as a situation unfolds.
- **Mobile Access**
A dedicated mobile app gives citizens, students, and employees a direct line to responders wherever they are.

Community & Enterprise Reach

- **Citizen Engagement & Schools**
Designed for community policing and campus safety programs, linking reporting parties to local authorities.
- **Private-Sector Security**
Supports proactive workplace-safety programs, giving employees a direct line to the GSOC to help prevent workplace violence.
- **Who It's For**
Deployed by law enforcement agencies, schools, and enterprises to support the communities and workforces they protect.

Modernizing public safety and enterprise security communication since 1994.
