PUBLIC SAFETY | ENTERPRISE SECURITY

FROM INCIDENT TO RESOLUTION — CONNECTING EVERY PIECE OF THE PUZZLE

Whether you operate a single-jurisdiction, a complex multi-agency environment, or a global enterprise, Valor Records seamlessly unifies your investigative workflow. From the moment a CAD event is created, every incident report, evidence item, and case action is automatically captured, connected, and tracked — delivering a complete, court-ready case record from first dispatch to final disposition.

Incident Documentation

- CAD-to-RMS auto-population
- Offense & supplemental reports
- Witness & suspect statements
- Arrest & booking integration
- Photo & document attachments
- Narrative documentation tools

Evidence & Chain of Custody

- Property & evidence intake
- Digital chain of custody logs
- Barcode / RFID item tracking
- Evidence location management
- Destruction & disposition logs
- Court submission tracking

Case & Link Analysis

- Case assignment & tasking
- Visual link analysis engine
- Person / vehicle entity linking
- Multi-case connection mapping
- Shared intelligence alerts
- NIBRS & Security Incident Report

SHARED INTELLIGENCE: Connect cases, persons, and evidence across agencies, jurisdictions, and enterprise security operations

01

Unified Platform

One platform, end-to-end
